

**ENVIRONMENT POLICY**

The Big Red Fleet Company acknowledges that the activities of the business impact on the environment. This policy and associated management system has been written considering the nature, scale and environmental impacts of our activities.

To maintain and implement our Environment Management System the Big Red Fleet Company;

- Comply with all applicable legal requirements and regulations that apply to our environmental aspects as detailed on the controlled documents register.
- Ensure that the Environment Management Systems is documented, implemented and maintained through internal audits, management system review and ongoing continual improvement.
- Ensure this Environment Policy and Management System is communicated to all employees and trainers working for or on behalf of the Company
- Prepare, review and monitor quality and business objectives through the management review process
- Are committed to continually improving and developing this environment management system through internal and external audits, management review and receipt of customer feedback.
- Are committed to preventing and reducing pollution through the effective implementation of the management system and associated processes.
- Make this policy available to members of the public on our website.

The Big Red Fleet Company will review this policy, environmental objectives, associated management system and environmental aspects and impacts at least annually at the Management Review Meeting. This review provides the framework for identifying areas of improvement and best practise and allows for the identification and implementation of measures to reduce our environmental impact.
